

## SUBPROJECTS PAGUS PARTNERS SUMMARY

Document to be filled by local partners

<b>Name of local partner. City</b>	SANTIAGO DE COMPOSTELA	
<b>Body</b>	City Council of Santiago de Compostela	
<b>Region</b>	GALICIA	
<b>Subproject name</b>	Qualification technicians	
<b>Acronym/(Ex. 4B) and Component</b>	2A	SANTIAGO DE COMPOSTELA
<b>Budget before reduction</b>	140.000 €	
<b>Current budget</b>	140.000 €	
<b>Work team</b>	Mercedes Rosón Ferreiro, Javier Fernández Muñoz, Oscar Andrés, Eva Maria Ezcurra de la Iglesia, María Soledad Domínguez Rodríguez	

**Local partner productions in each Subproject. Ex. Participation Web site, Interpretative movie, Sociological Study, Radio Program. Foreseen and accomplished actions.**

Inside the European regions, most of the historical centres of cities are protected being considered as cultural interest elements. This protection seeks the conservation of the whole historical architectural styles as well as their space or urban environments, but avoiding to become them into museums, the social surroundings transformation and the unbalance of their urban functions.

With these aim, component 2 of "Assistance program and supporting Urban Management (PAGUS)" is created. Regional Environment Activity inside the South Area of INTERREG III-C OF THE European Commission: Managing of human resources in the historical centres rehabilitation". There was two editions of the of "Workshop for Urban Renovation and Restoration". One in 2005-2006 ando other in 2006.

Talks, seminars, practical sessions and tutorials have been held with a duration of 158 hours in 75 lectures from de first edition and 288 hours in 84 practical lecturas from de second.

Another production in this subprojet is de web site where you can see the works of the work groups from the workshop.(<http://www.renovacion-urbana.net/>)

**Achieved results: Ex. Knowledge of the morphology of Baeza city in the Renaissance in order to obtain citizen heritage awareness. Citizen participation in Allariz in municipal initiatives.**

The effective conservations of the historical centres need the following agents:

- Qualified technicians and companies with specialized knowledge according to the own characteristics of every architectural style which is tried to rehabilitate.
- Public managers able to attend the residents, individualising every case by advising and channelling every assistance demand in the housing renovation.
- Institutions which create useful knowledge. Therefore, the agents which work in the conservation and recovery of historical urban centres can base on solid appropriate criteria depending on the particular conditions of every region and, at the same time, can join the different factors which take part in this field.

***Foreseen Effects. Ex. People awareness of the heritage and positive repercussion in the conservation of the historic city.***

In order to keep inhabited those historical centres, mostly occupied by marginal or poor population sectors, avoiding at the same time the overpopulation or an abusive tourist use, territorial programs of support to the recovery of the habitability of housing and buildings are needed to settle the resident population and interventional programs dedicated to get better surroundings and the creation and endowing of equipments and services which make coexistence and life easier.

***Dissemination activities (As publications, CD ROMs, Brochures, Webs, etc)***

(attached files)

***Continuity expectations***

The local agents that have taken part in the development of the "Master of Management of human resources in the historical centres rehabilitation" regarding to the lines A, B, C and D of the component 2, have taken the commitment of continuing the activities with own resources.

***Link up with the transversal European policies: Gender, environment, sustainable policy, etc.***

Environment and sustainable, especially in questions over development of historical cities

***Others data that could illustrate the partner activities as: Number of hours of work, description of technical and administrative visits, beneficiary of new devices and any others remarks that the partner consider necessary to phrase.***

XOÁN A. SOLER

Publicidad

El arquitecto César Portela pronunció la conferencia de apertura de una nueva edición del Aula de Renovación Urbana e Rehabilitación, después del acto oficial de inauguración que se celebró en el Paraninfo de Geografía e Historia.

El curso, que se desarrollará hasta el día 22 en A Chocolaría, aborda de manera práctica proyectos de renovación urbana de distintos centros históricos de Galicia. Se imparte en el marco del programa europeo **Pagus**, del que la Consellería de Vivenda e Solo es el socio principal de un grupo que integran cuatro regiones europeas más y Andalucía, y con el Concello de Santiago, el COAG, la Fegamp y la USC de socios locales.
